

How to update your Outgoing Mail Server (SMTP) - Entourage for Mac OS X

Follow this tutorial **if you can receive your email but cannot send mail.**

1 - Open **Entourage**.

2 - Click on the **Tools** menu and select **Accounts**:

3 - Double-click on the name of your tedata e-mail account. A window called **Edit Account** will open.

Edit Account

Account Settings Options

Account name: **Account Name**

Include this account in my "Send & Receive All" schedule

Personal information

Name: **Your Name**

E-mail address: **username@tedata.net.eg**

Receiving mail

Account ID: **username**

POP server: **mail.tedata.net.eg**

Password: *********

Save password in my Mac OS keychain

[Click here for advanced receiving options](#)

Sending mail

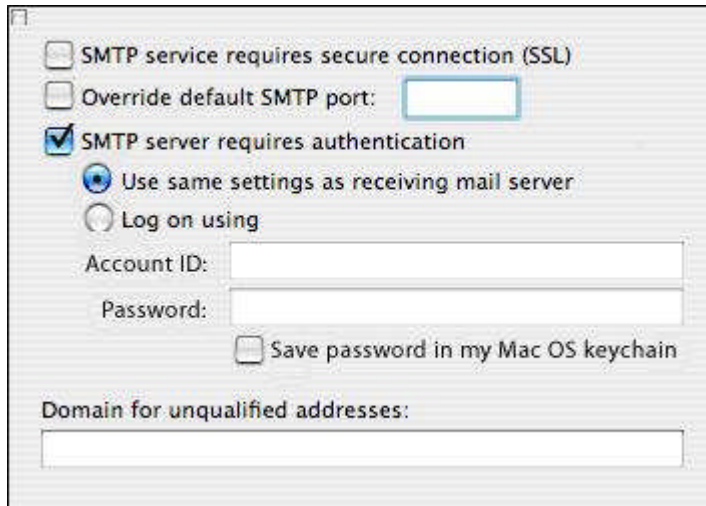

SMTP server: **out.tedata.net.eg**

[Click here for advanced sending options](#)

Cancel OK

Under the **Sending mail** category in the lower portion of the screen, in the **SMTP server** field, you should have: **out.tedata.net.eg**

Click on the button labeled **Click here for advanced sending options**. This will pop up the following dialog box:

Make sure that the first 2 boxes are unchecked

Check the third box that says **SMTP server requires authentication**.

Select the first radio button that says **Use same setting as receiving**

Close out of this dialog box.

Click the **OK** button to save your settings
